PROJECTS

Nxt Watch ([kedarnxtwatch](#))

Built the Nxt Watch application, modeled after YouTube, enabling users to log in, explore video categories such as Trending and Gaming, access saved videos, and search for specific content while adjusting the interface theme.

- Developed Login, Home, Trending, Gaming, and Saved videos pages utilizing React components, props, state management, lists, and event handling.
- Facilitated user authentication with username/password input, login API calls, and maintained persistent login states using JWT tokens and local storage.
- Incorporated React Router components for distinct routes and protected access, redirecting unauthenticated users to the login page.

Technologies used: React JS, CSS , Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

Match Game Application ([kedarmatchgame](#))

Developed a responsive Match Game application With dynamic image matching and Timer functionality using React.js

- Designed user-friendly tabs for category selection and image thumbnails
- Successfully integrated provided design elements (colors, images) into the UI
- Created a "PLAY AGAIN" feature for game replayability.

Technologies used: React JS, CSS

Jobby App ([kedarjobbyapp](#))

Developed a comprehensive job search solution, Jobby App.

- Designed pages for Login, Home, Jobs, and Job item details with React components and form inputs.
- Secured user data with JWT tokens, REST API calls, and local storage.
- Implemented protected routes and persisted login state with React Router and local storage.

Technologies used: React JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication
